Total Sales

Insight:

Sales are unevenly distributed across categories, with some categories capturing a disproportionate share of revenue.

Decision:

Reallocate marketing efforts and inventory to benefit the highest-performing categories.

Insight:

Total sales reached approximately 925,000, while gross profit was approximately 102,000, resulting in a profit margin of approximately 11%, indicating stable but potentially improving profitability.

Decision:

Work to improve profit margins by reducing ineffective discounts and focusing on higher-margin products.

Total Sales by Category

Total Profit by Category

Insight:

The Technology category achieved the highest overall profit compared to other categories.

Decision:

Increase focus on Technology products and expand their inventory.

Total Sales by Category

Category	Total Profit	Total Sales	%GT Profit Margin
Technology	33,499.40	315,560.34	96.33%
Furniture	34,215.78	309,080.52	100.45%
Office Supplies	34,259.67	300,714.05	103.38%
Total	101,974.85	925,354.91	100.00%

Total Profit by Category

Insight :

The Technology category achieves the highest gross profit and best profit margin compared to other categories, while the Furniture category achieves high sales but a lower profit margin.

Decision :

Increase investment in Technology products, and review the pricing and discount policy for the Furniture category to improve profitability.

Total Sales by Month

Insight:

The data shows a clear seasonal pattern, with sales rising significantly in the fourth quarter.

Decision:

Increase inventory and intensify marketing campaigns during the fourth quarter to capitalize on peak demand.

Total Profit by Year

Insight:

Annual earnings are expected to remain relatively stable between 2023 and 2024, with opportunities for improved growth.

Decision:

Setting annual growth targets supported by enhanced pricing and marketing strategies.

Product Profitability

Insight:
A limited number of products contribute a significant percentage of total profits, indicating a concentration of profitability.

Decision:
Focusing on these products in marketing campaigns and ensuring their consistent availability.

Insight:
Some products generate low or near-stagnant profits despite achieving sales.

Decision:
Reprice these products or reduce the discounts applied to them.

Total Profit and Total Sales by Customer Segment

● Total Profit ● Total Sales

Insight:
The Home Office segment is experiencing lower sales compared to other segments.

Decision:
Offer customized promotions and targeted marketing campaigns to stimulate demand in this segment.

Insight:
The Consumer segment generates the highest sales volume compared to other segments.

Decision:
Enhance targeted promotional offers for this segment while maintaining profitability.

Insight:
The Corporate segment achieves a good balance between sales and profit.

Decision:
Expand partnerships and long-term contracts with Corporate clients.

Average of Profit by Discount

Insight:
Average profit drops significantly at discounts exceeding 20%, sometimes resulting in losses.

Decision:
Set a maximum discount limit of 20% and establish specific approvals for higher discounts.

Executive Summary

Total Sales by Category

Total Profit by Category

Insights :

- Total sales reached approximately 925K with a profit margin of 11%, indicating stable but improvable performance.
- The Technology category generates the highest overall profit, while Furniture achieves high sales with lower margins.
- Sales show a clear seasonal peak in the fourth quarter, driven by increased demand.

Decisions :

- Focus investment and inventory expansion on Technology products.
- Review pricing and discount strategies for Furniture to improve margins.
- Increase inventory and marketing efforts during the fourth quarter.
